

■ **High Cube Road Transportation Regulations in South Africa - Update**

December 28, 2009

Dear Customer,

Please note that with immediate effect, High Cube containers are once again allowed for transport on South African Roads on normal trailers. The Department of Transportation has ceased specialized enforcement against High Cube containers until further notice.

They have issued the order for impounded vehicles to be released immediately, once proper legal and administrative procedures have been followed.

For further information kindly contact your local Hapag-Lloyd sales representative.

Kind regards,

Hapag-Lloyd AG
